Graphic Girl Complex Face Cane

Join us as Julie gives us step-bystep instructions on how to make the beautiful face cane to the right. This picture is the graphic that Julie will use. We will each go home with our very own face cane. Slices of your face cane can be used on bracelets, pendants and even placed with additional art on a canvas. This class is not for the faint of heart, but I encourage you to sign up and jump in. Be prepared to learn a lot in these two days!

These pictures are just a small sampling of other face canes Julie has made. Beautiful, aren't they?

JULIE EAKES is a polymer clay artist. She has been working with the medium for over six years. In the late 90's, Julie worked as a computer modeler and animator while creating a computer adventure game, Morpheus. This background helped her visualize and produce her intricate polymer clay canes.

Julie specializes in face canes and the variety of ways of presenting the image in canework. Examples of her work can be found in Lisa Pavelka's book, *The Complete Book of Polymer Clay*. Julie is a winner in the Progress and Possibilities contest sponsored by the IPCG. She will soon have a book on polymer clay, published by Design Originals. Julie teaches her face cane classes around the country. Follow her thoughts and see her newest work on her blog:

JulieEakes.blogspot.com.
